

Architecture Infographics

Here's where this template begins

Architecture Infographics

Corner

Mars is red and very cold

Wall

Venus has a beautiful name

Ground floor

Mercury is the smallest planet

Architecture Infographics

Residential

Jupiter is a gas giant and the biggest planet

Retail

Neptune is the farthest planet from the Sun

Office building

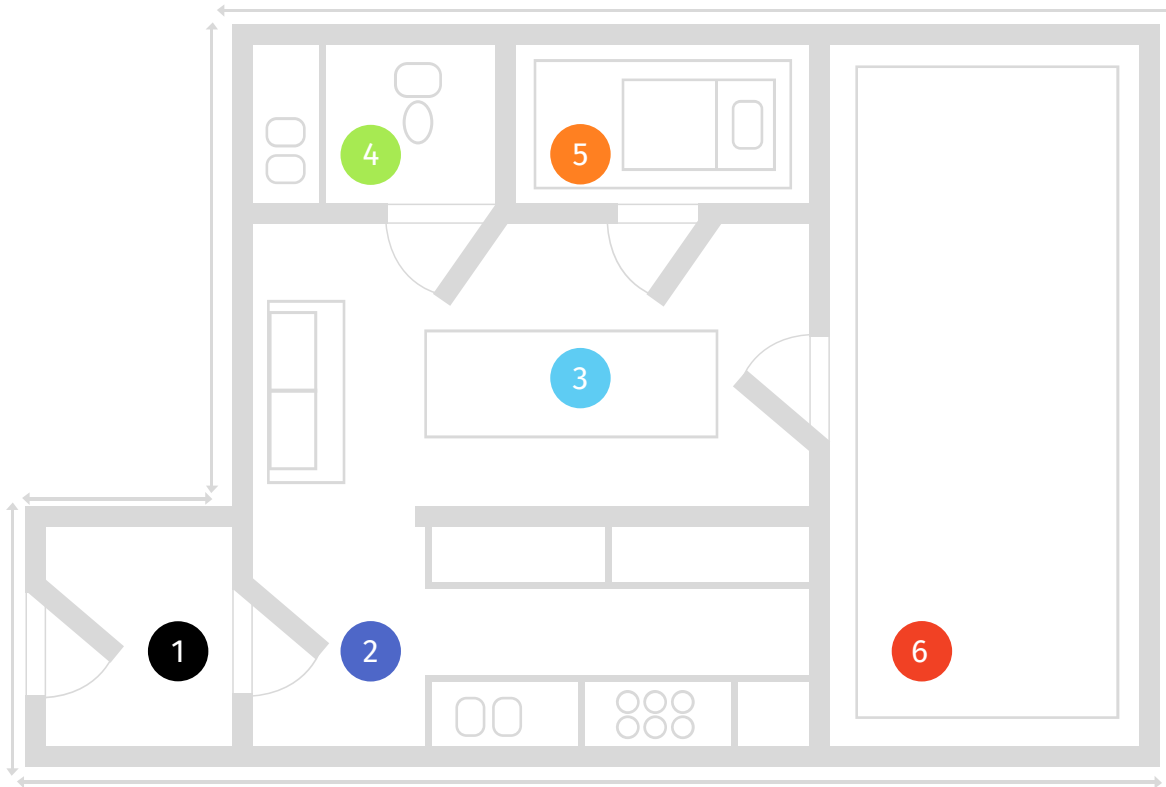

Saturn is the ringed one and the second-largest

Resort

Venus has a beautiful name, but it's very hot

Architecture Infographics

Hall 1

It's the farthest planet

Kitchen 2

It's a gas giant as well

Living-room 3

It's the ringed one

Toilet 4

It has a nice name

Bedroom 5

It's a cold place

Dining-room 6

It was named after a god

Architecture Infographics

01

Reform

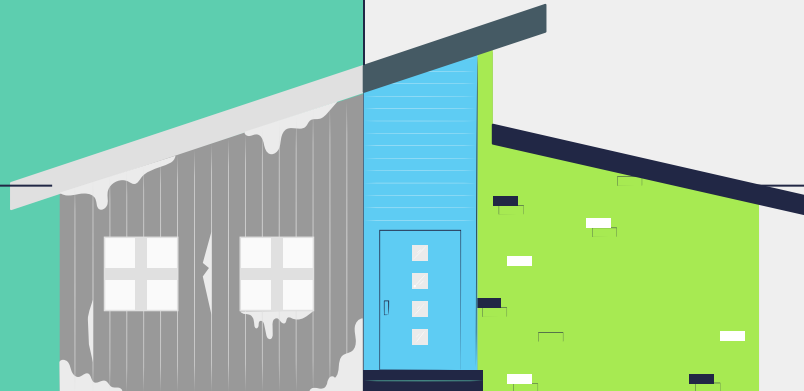

Venus has a beautiful name but it's terribly hot. It's the second planet from the Sun

02

Restyling

Mercury is small and the closest planet to the Sun. It was named after a god

Architecture Infographics

Rooftop

Neptune is the fourth-largest planet in the Solar System

Second floor

Mars is a very cold place. Its atmosphere is full of iron oxide dust

Ground floor

Jupiter is a gas giant and the biggest planet in the Solar System

Top floor

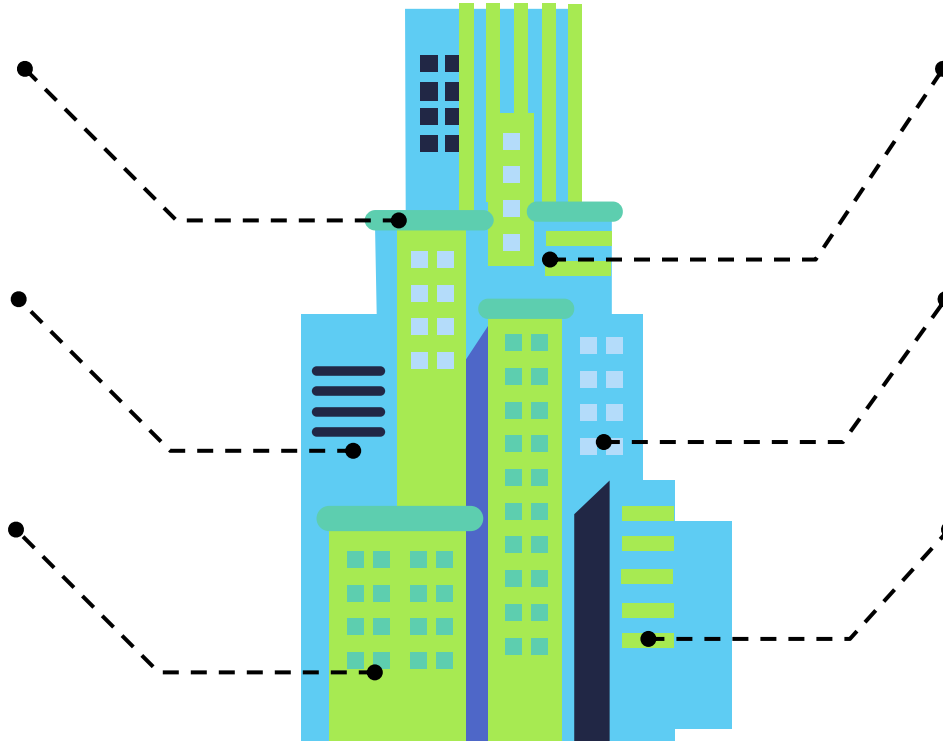

Uranus is the seventh one from the Sun and is the coldest planet

Third floor

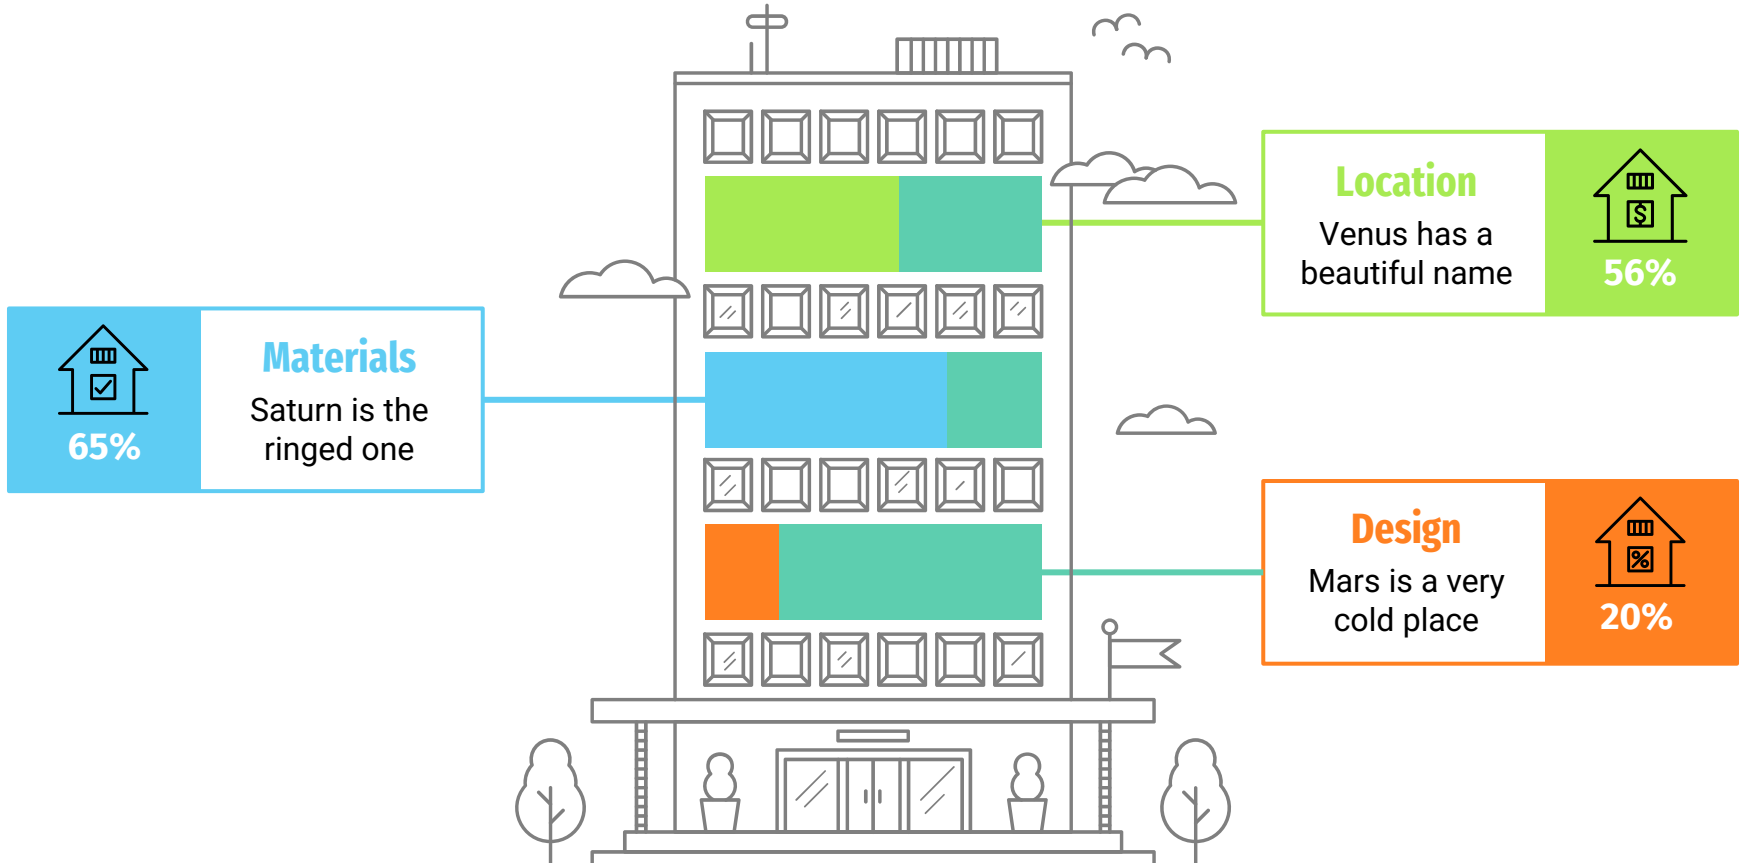

Saturn is a gas giant and is composed mostly of hydrogen and helium

First floor

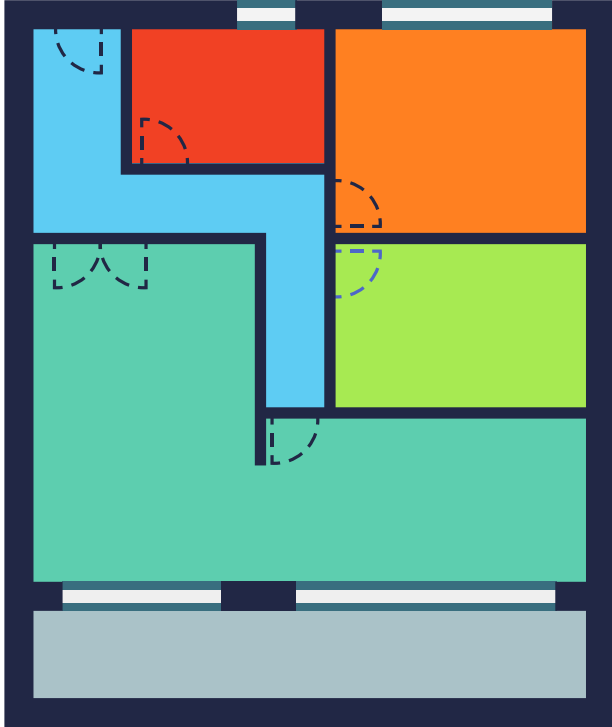

Earth is the only planet in the Solar System known to have life on it

Architecture Infographics

Architecture Infographics

Saturn is composed of hydrogen and helium

Jupiter is a gas giant as well and it's the biggest planet

Neptune is the farthest and the fourth-largest planet

Venus has a nice name and is the second from the Sun

Earth is the third from the Sun in the Solar System

Uranus is the seventh one from the Sun and the coldest

Mercury is small and is the closest planet to the Sun

Architecture Infographics

1

Modern

Venus has a beautiful name, but it's terribly hot indeed

Classic

Jupiter is actually a gas giant and the biggest planet

3

Vintage

Despite being red, Mars is actually a very cold place

2

Contemporary

Earth is the only planet known to have any life form on it so far

4

Architecture Infographics

01

Roof

Venus has a beautiful name, but it's terribly hot indeed

02

Walls

Mercury is small and is the closest planet to the Sun

03

Chimney

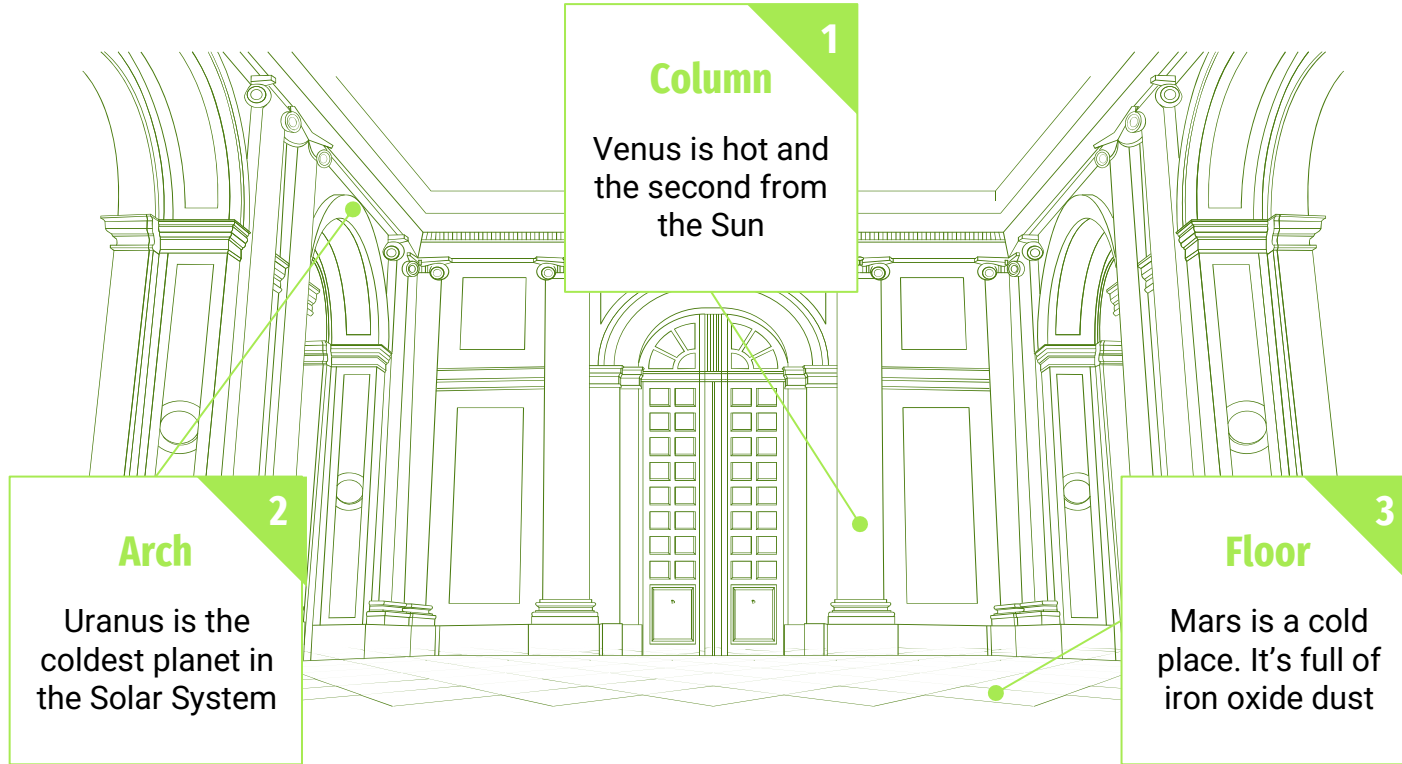

Saturn is ringed and composed of hydrogen and helium mostly

04

Window

Mars is a very cold place. It's full of iron oxide dust

Architecture Infographics

Architecture Infographics

01

Mercury is the smallest planet, only a bit larger than the Moon

02

Venus is very hot and the second planet from the Sun

03

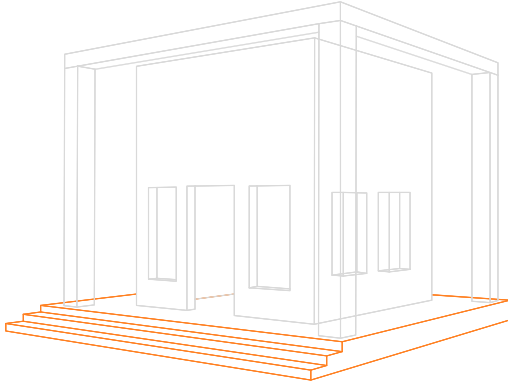

Mars is actually a very cold place. It's full of iron oxide dust

04

Saturn is ringed and composed mostly of hydrogen and helium

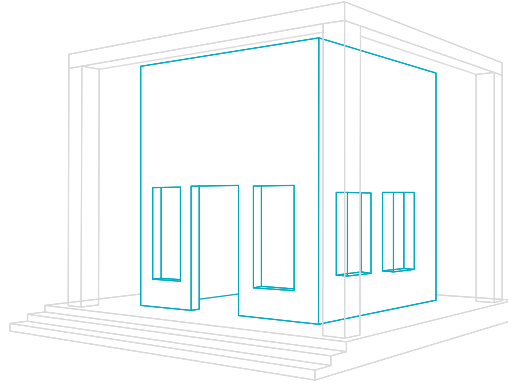

Architecture Infographics

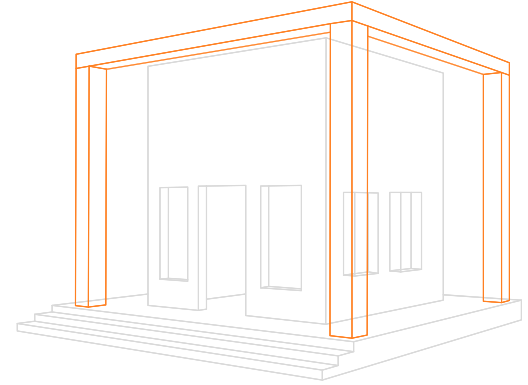

Floor

Despite being red, Mars is actually a cold place. It's full of iron oxide dust

Walls

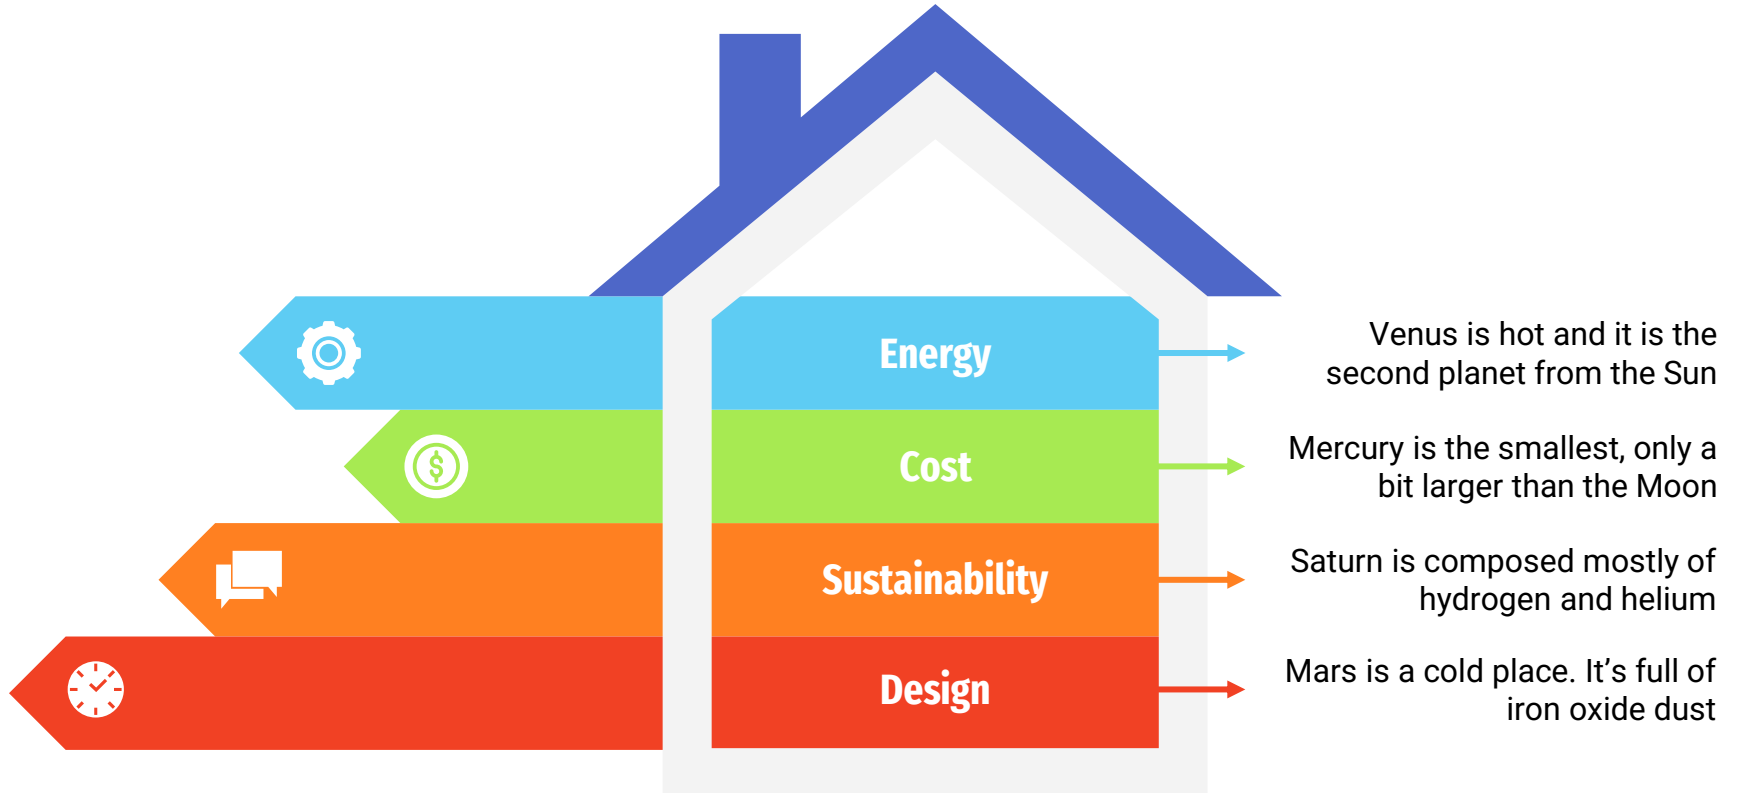

Venus has a nice name, it's hot and it is the second planet from the Sun

Structure

Saturn is the ringed one. It's composed mostly of hydrogen and helium

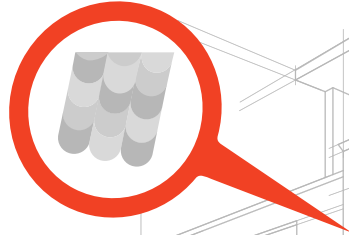

Architecture Infographics

Architecture Infographics

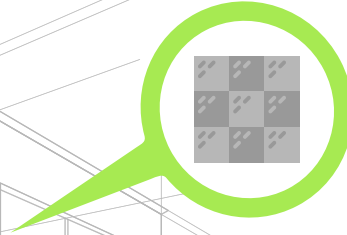

Roof

It is the smallest, only a bit larger than the Moon

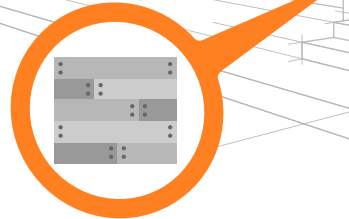

Floor

Venus is hot and the second planet from the Sun

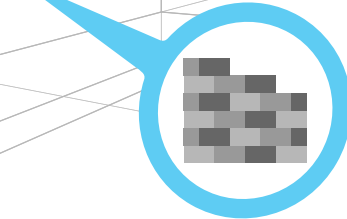

Stairs

Saturn is a gas giant and is a ringed planet

Wall

Mars is actually a cold place. It's full of iron oxide dust

Architecture Infographics

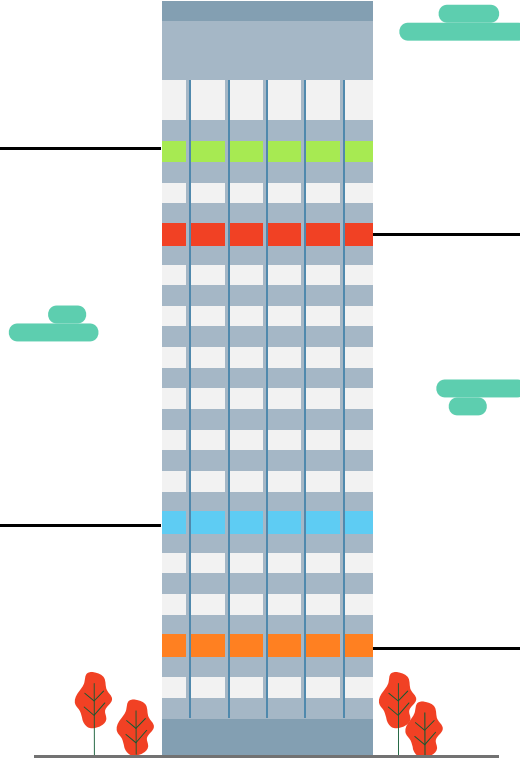

Water

Venus has a beautiful name, but it's terribly hot

Ergonomics

Mars is a very cold place despite being red

Heat

Saturn is the ringed one and the second-largest planet

Electricity

Jupiter is also a gas giant and the biggest in the Solar System

Architecture Infographics

Saturn is the ringed one and also a gas giant

Jupiter is the biggest planet in the Solar System

Neptune is the fourth-largest planet of them all

Earth is actually the third planet from the Sun

Uranus is the coldest planet in the Solar System

Venus is very hot and the second from the Sun

Architecture Infographics

40%

Saturn is a gas giant
and has rings

20%

Jupiter is a gas giant
and the biggest planet

10%

Neptune is the
farthest from the Sun

90%

Saturn is a gas giant
and has rings

50%

Jupiter is a gas giant
and the biggest planet

70%

Neptune is the
farthest from the Sun

Architecture Infographics

01

Design

Mars is actually a cold place. It's full of iron oxide dust

02

House plan

Venus is hot and it is the second planet from the Sun

03

Building plan

Saturn is composed mostly of hydrogen and helium

Architecture Infographics

Attic

Neptune is the fourth-largest planet in the Solar System

Bedroom

Mars is a very cold place. Its atmosphere is full of iron oxide dust

Kitchen

Jupiter is a gas giant and the biggest planet in the Solar System

Toilet

Uranus is the seventh one from the Sun and is the coldest planet

Bedroom

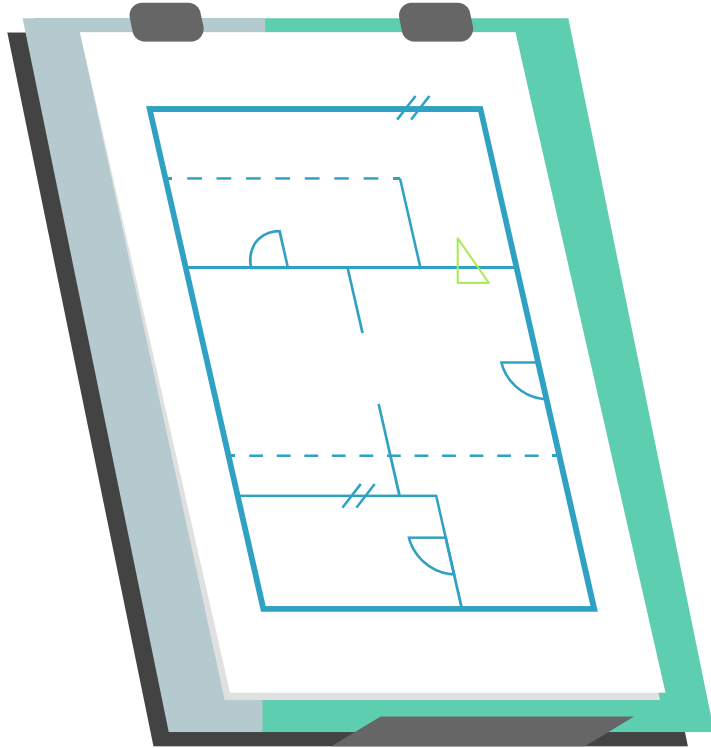

Saturn is ringed and is composed of hydrogen and helium mostly

Living room

Earth is the only planet in the Solar System known to have life on it

Architecture Infographics

Window

Earth is the third planet from the Sun in the Solar System

Vent

Saturn is ringed. It's composed of hydrogen and helium

Door

Uranus is the seventh one from the Sun. It's the coldest

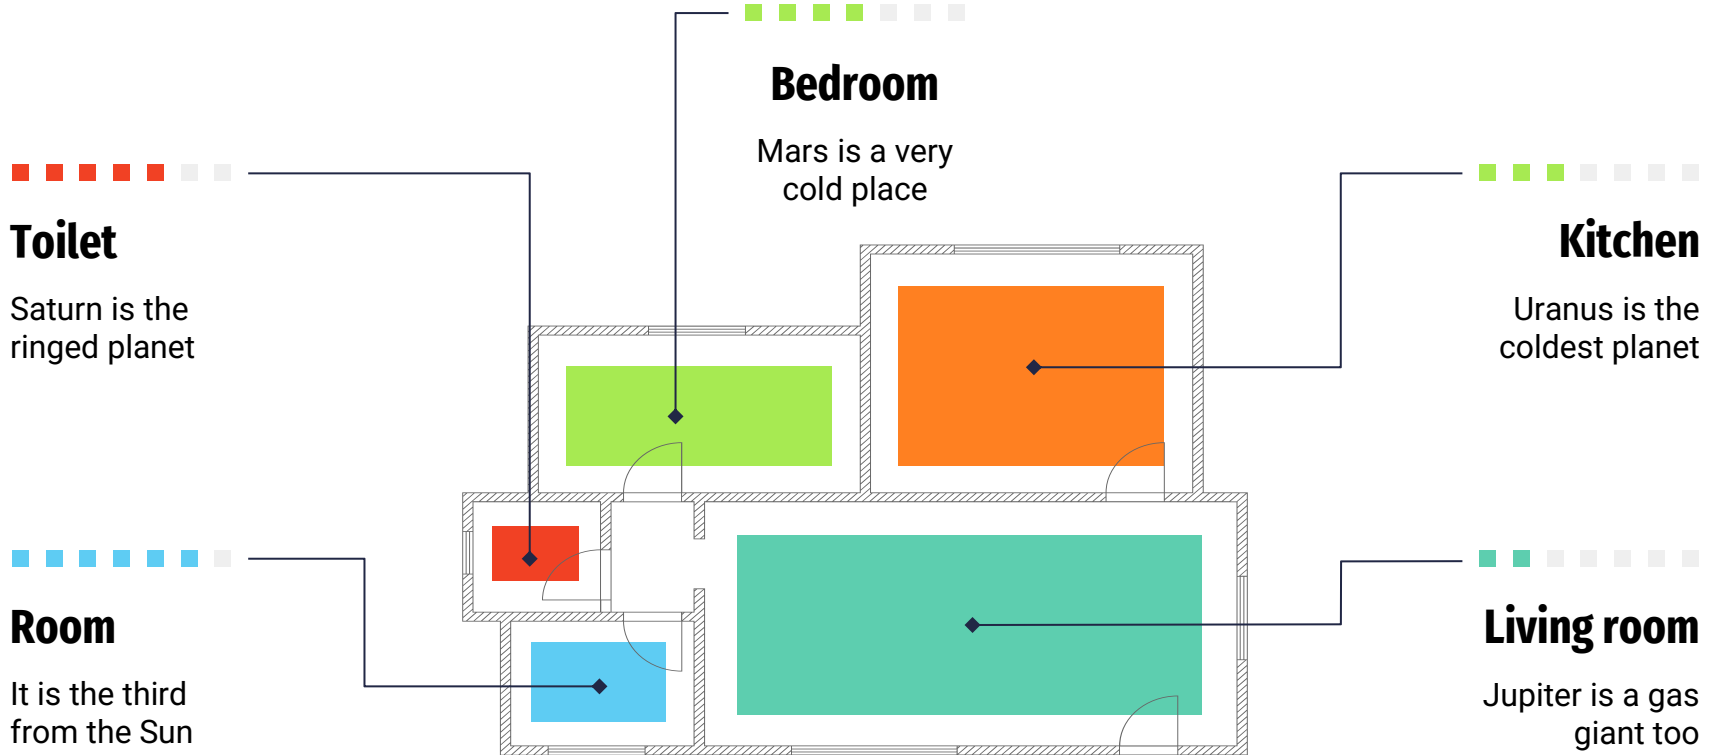

Wall

Jupiter is a gas giant as well and is the biggest planet

Architecture Infographics

Architecture Infographics

Design

Mars red and it's a very cold place. It's full of iron oxide dust

01

Style

Saturn is the ringed planet. It is a gas giant as well

02

Security

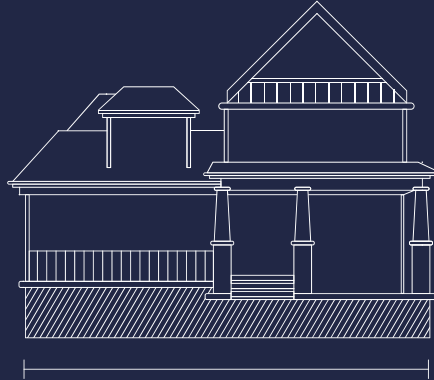

Venus is terribly hot and is the second planet from the Sun

03

Sustainability

Uranus is the seventh one from the Sun. It's the coldest

04

Architecture Infographics

Saturn

Saturn is the
ringed planet

Mars

Mars is a very
cold place

Earth

It is the third
from the Sun

Uranus

Uranus is the
coldest planet

Architecture Infographics

Mercury

It's the smallest one in the Solar System

Jupiter

It's the biggest planet in the Solar System

Venus

Venus has a beautiful name, but it's hot

Saturn

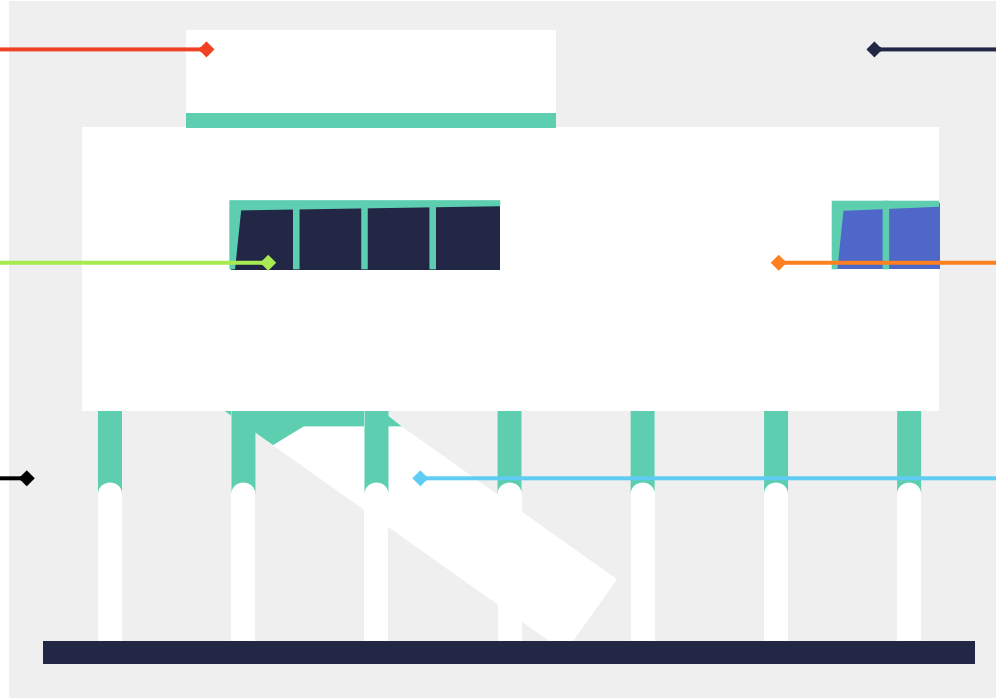

It's composed of hydrogen and helium

Neptune

It's the farthest planet from the Sun

Mars

It's a cold place. It's full of iron oxide dust

Architecture Infographics

Design

Earth is the third planet from the Sun in the Solar System

Construction

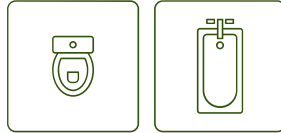

Uranus is the seventh one from the Sun. It's the coldest

Architecture Infographics

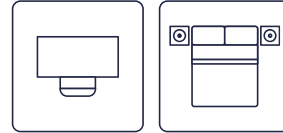

Toilet

Uranus is the seventh one from the Sun. It's the coldest

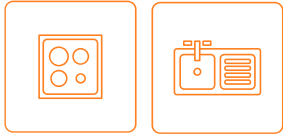

Bedroom

Earth is the third planet from the Sun in the Solar System

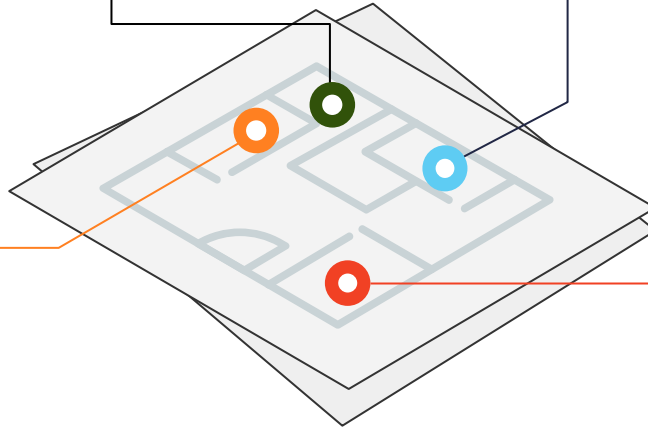

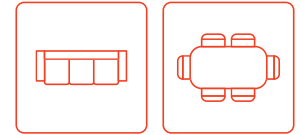

Kitchen

Jupiter is a gas giant and the biggest planet in the Solar System

Living room

Saturn is ringed. It's composed of hydrogen and helium

Architecture Infographics

House plan

Jupiter is a gas giant and also the biggest planet in the Solar System

1

2

Materials

Saturn is a gas giant in the Solar System, composed of hydrogen and helium

Construction

It has a beautiful name and is the second planet from the Sun in the Solar System

3

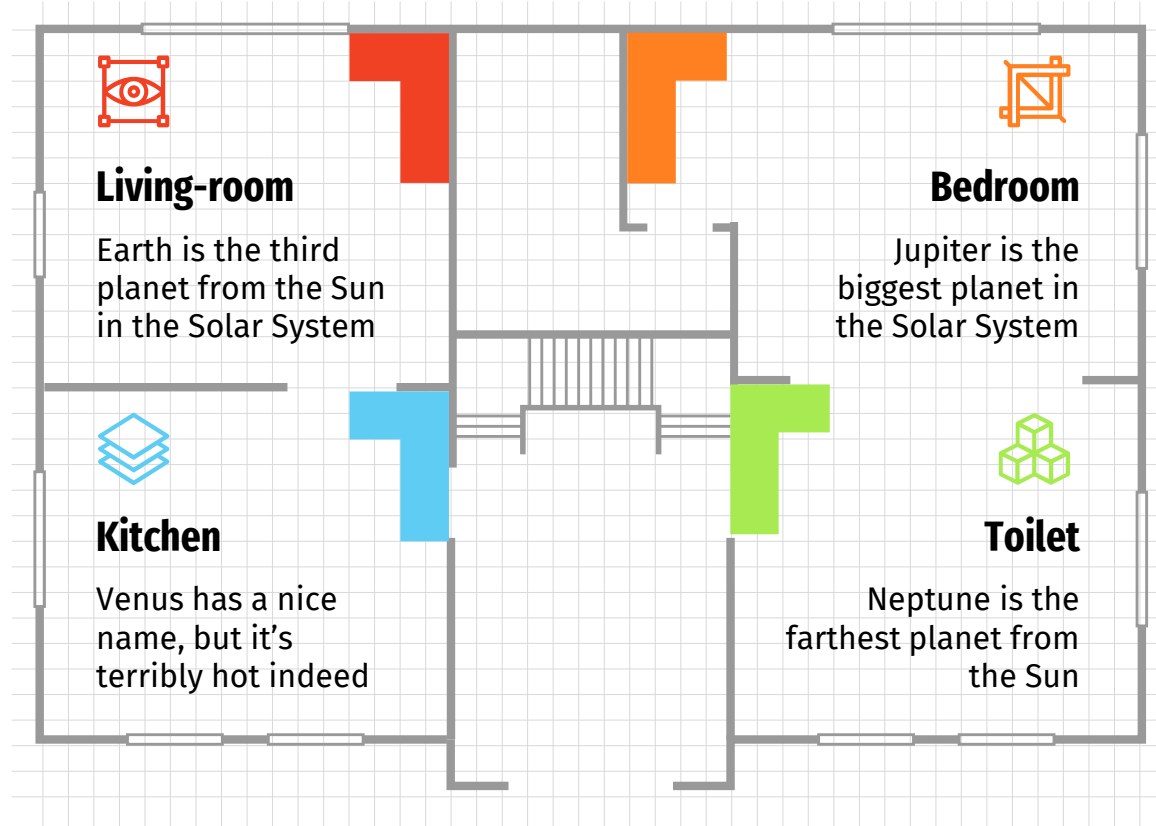

4

Decor

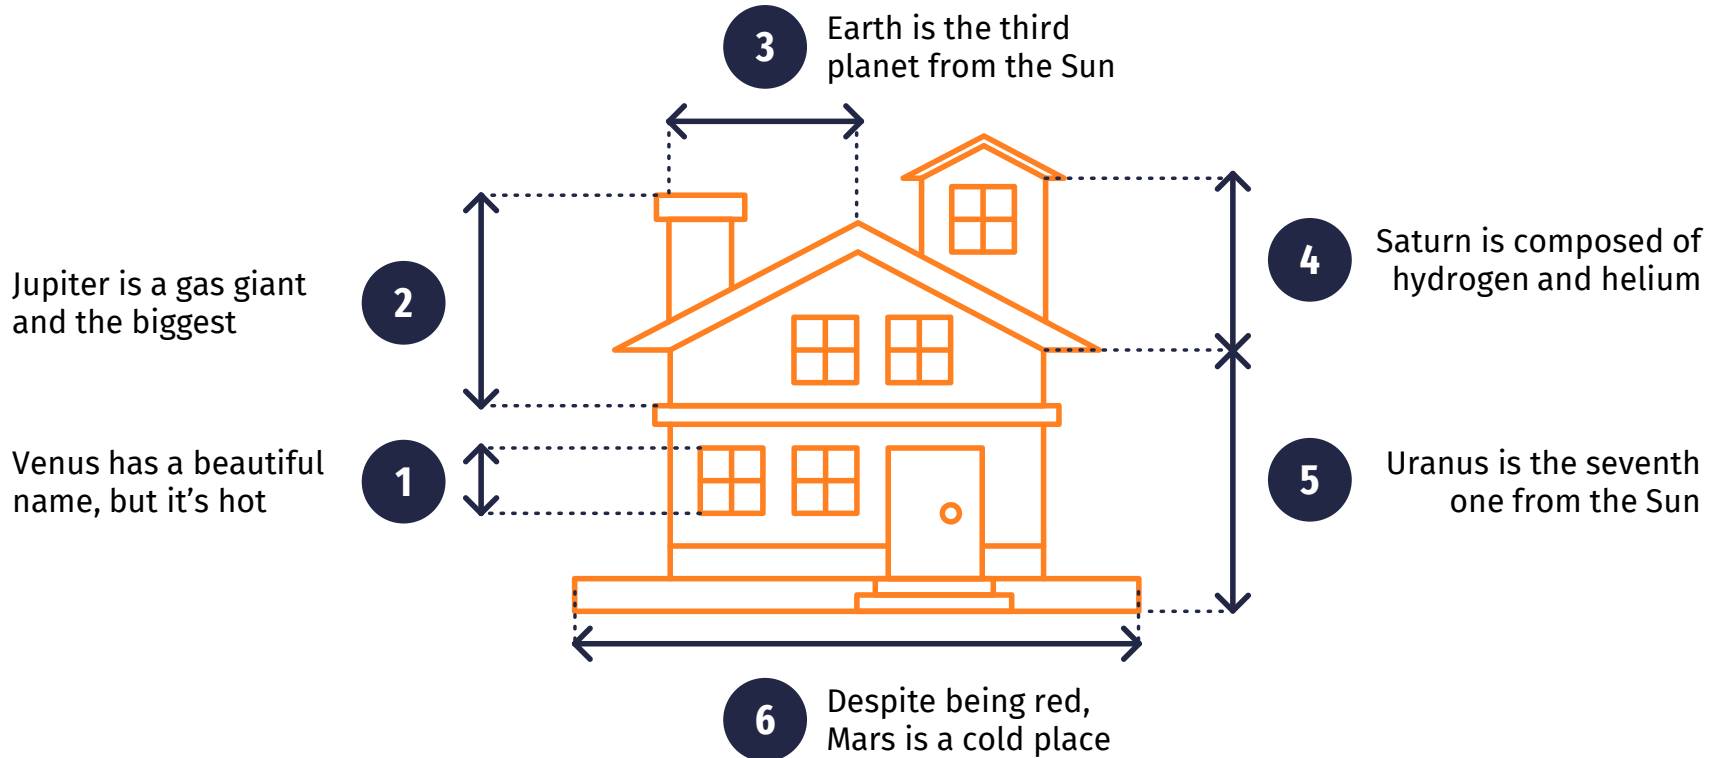

Neptune is the fourth-largest planet by diameter in the Solar System

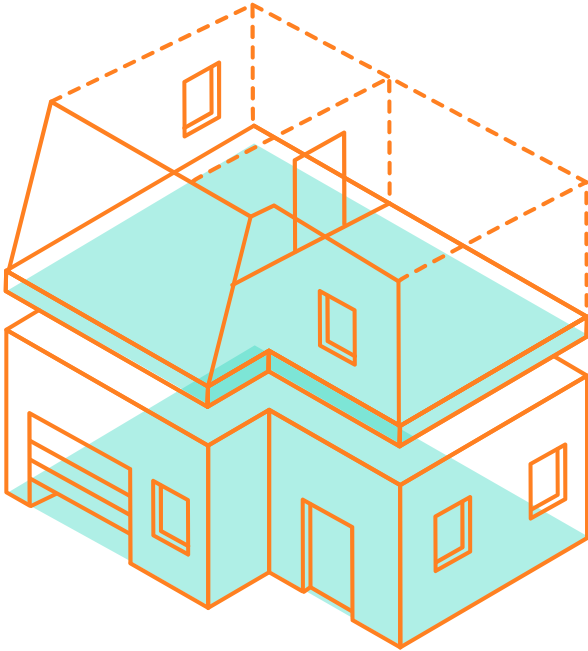

Architecture Infographics

Architecture Infographics

Architecture Infographics

Connectivity

Saturn is the ringed one. It's composed of hydrogen and helium

Privacy

Neptune is the farthest planet from the Sun

Comfort

Earth is the third planet from the Sun in the Solar System

Services

Uranus is the seventh one from the Sun. It's the coldest
